Comments: (such as, notable birds seen, interesting bird or animal behavior, condition of the birding site, participant comments):

An excellent day for birding. Our trek was through the meadow area which links up with the connector trail to link back to the Trailhead. As we came out of the woods into the meadow area, that area was active with the warblers. As we were on the old trail road on the back side of the meadow area the Tanagers were active along with a Ruby-throated Hummingbird. All in all the weather was great and the birds were active, an excellent day.
