Comments: (such as, notable birds seen, interesting bird or animal behavior, condition of the birding site, participant comments):

It was an excellent day for a Bird Walk. The Indigo Bunting and the Prairie Warbler we both seen and heard in the low growth area across Plainfield Road from the Trailhead. Several bird species were very active over there. The Eastern Warbling Viro was heard in an area off of the Wetlands Loop Trail, there is a man-made unofficial trail that leads uphill to see the back section of the wetlands seen from Plainfield Road. This area is heavily overgrown. However, I was able to get a couple of clean recordings of its song as it was signing for several minutes in that area. All in all, an excellent birding day.
